

Have a Great Audition!

Research the Requirements

Every production posts a segment that asks what they would like to see. Sometimes they ask for a song of your choice, other times they ask for a song from the show. Sometimes they ask for 16 bars instead of 32. Be sure to put your best foot forward by preparing what the production team asks for!

Song & Monologue Selection

Pick song selections that best showcase you as a performer and your range. You also want to be smart about what style the show is. You wouldn't want to sing a contemporary rock ballad for *The Sound of Music*!

Dress to Impress!

An audition is like an interview: this is the first time the production team is meeting you, so dress to show your personality and professionalism!

Practice Slating (Introducing yourself)

Be sure to practice slating before you start your audition. State your name, the title of the song, and the show it is from. Same goes for your monologue.

HAVE FUN!

View your audition as a performance, and enjoy it! Make those character choices, and show you are ready to dive into two weeks of theater!
